SUMMARY

B2B marketing and partnerships professional with 6 years across a NASDAQ-listed AI consulting firm, a Tiger Global/Sequoia-backed insurtech, and a leading fintech platform. Currently the sole marketing owner for Grid Dynamics India, running client, talent, and brand marketing end to end. Track record of building from zero: promoted twice in under two years at Plum on \$3M+ in partner-sourced accounts; grew ClearTax's BFSI and Payroll vertical 20x YoY across 54 institutional partnerships; ran a 12-event flagship program and two CXO summits at Grid Dynamics. Also build product and take it to market — designed, shipped, and grew an AI workflow platform solo, live in production.

EXPERIENCE

Marketing Lead, India — Grid Dynamics (NASDAQ: GDYN)

Jul 2024 – Aug 2026

AI consulting and digital engineering firm serving Fortune 1000 clients | Bengaluru

- Sole marketing owner for India across three verticals — client marketing, talent marketing, and brand — with no team beneath me and no daily supervision.
- Ran 12 Tech Talks (called 'Dynamic Talks') across 3 cities, generating over 5,000 qualified talent prospects; averaging 400+ per event.
- Delivered 2 India flagship client events, the latest in partnership with ISB, engaging 200+ Fortune 1000 CXOs and directly supporting enterprise sales pipeline.
- Shifted brand awareness among target tech talent from 20% to 80%, tracked through a consistent survey question across event registrants over two years.
- Rebuilt employer brand — Glassdoor 3.2 to 3.9 in six months, AmbitionBox 2.0 to 3.1, and India grew to 48% of the company's global LinkedIn following; generated 1,200+ talent leads that influenced 20+ direct hires and 300+ indirectly.
- Owned performance marketing - ran paid social on LinkedIn and Meta, owning targeting, creative, budget, and attribution; reallocated spend toward higher-ROI channels to improve budget efficiency
- Partnered with global marketing, design, sales, and delivery leadership to align India execution with global GTM priorities — ensuring local initiatives fed enterprise pipeline, account expansion, and AI positioning narratives.
- Built India's AI-employer positioning framework — a quarterly Dynamic Talks cadence and an AI Center of Excellence narrative — tying local brand to global AI priorities.
- AI-native operator running full campaign cycles — research, content, decks, video scripts while also owning agency relationships, brand governance, and marketing SOPs adopted across all three India offices.

Partnerships & Experiential Marketing — Plum

Jul 2022 – Jul 2024

Tiger Global / Sequoia-backed group health insurance and benefits platform | Bengaluru

Promoted twice in under two years: Partnerships & Community Builder → Senior Associate, Experiential Marketing & Partnerships → Assistant General Manager, Partnerships

- Owned partner ecosystem strategy as AGM — set GTM priorities, signed strategic co-marketing motions, and managed CXO relationships across 100+ enterprise accounts.
- Closed \$3M+ in key accounts through enablement, executive forums, and high-touch account marketing; improved partner engagement performance.
- Established Plum's foundational partner ecosystem from zero -> recruiting and onboarding government bodies, associations, VCs, Accelerators, Incubators, and coworking networks; created repeatable partner-led demand channel.
- Scaled the experiential marketing function — designed and hosted 8+ major events across 7 major cities, plus partner activations and immersive customer experiences, generating 150 enterprise sales-accepted leads.
- Built co-marketing playbooks and enablement assets across 50+ partner organizations, codifying winning campaign templates and partner GTM frameworks; onboarded 50+ partners.
- Drove community-led growth through CXO roundtables, founder forums, and joint webinars — deepening relationships across 100+ enterprise accounts and strengthening category positioning.
- Recognized: Top 25 Emerging Leaders 2024 — Indian Startup Times.

Partnerships Manager, BFSI & Payroll — ClearTax (now Clear)

Feb 2021 – Jul 2022

India's leading fintech and tax-compliance platform, serving millions of consumers and 1M+ businesses | Bengaluru

- Drove \$7M in BFSI partnership revenue by building and managing 54 partner relationships across banks, NBFCs, and financial platforms — delivering 20x YoY growth for the vertical.
- Reached 150,000 Indian consumers through co-branded campaigns, digital content distribution, and channel-led activations, establishing ClearTax as a category-leading ITR partner in the BFSI segment.
- Managed API, CG, and PWA integrations end to end across BFSI partners — reducing onboarding friction and lifting conversion across co-branded experiences.
- Shipped integrated BFSI campaigns by coordinating Product, Legal, Tax Expert, Social, and Ops teams — launching 50+ partner microsites, mailers, and creative assets via Webflow, Canva, and Mailchimp.
- Hosted and managed webinars end to end with fintech industry leaders — sourcing speakers, building content, and converting attendance into a partner pipeline.
- Led a 12-member team with performance frameworks, structured training tracks, and incentive programs — improving output by 40% and creating a scalable partner operations function.

GTM & Recruitment Consultant (Freelance) — Northlance Agency

Jun 2020 – Jan 2021

- Advised early-stage startups on go-to-market positioning, outbound motions, and hiring pipelines.

PRODUCT & GO-TO-MARKET

Product Engineer — Currly (currllyai.com)

Jun 2026 – Present

AI workflow platform — describe the outcome, get the workflow

- Built and shipped an AI workflow platform solo — Next.js, Supabase/pgvector, OpenAI, Vercel — with 1,400+ tools and 111+ workflows live in production.
- Designed a 5-signal Postgres ranking engine (semantic, lexical, quality, freshness, behavior) holding p95 search latency under 400ms.
- Rebuilt a broken inherited stack: fixed a search_path bug that had silently disabled semantic search in production, and cut 60MB search payloads down to kilobytes.
- Raised paraphrase stability from 29% to 62% with a canonical-intent layer, measured against an eval harness I built for the purpose.
- Architected the product's defensible asset — proprietary D7/D30 outcome data on which AI tool combinations actually work, gated at n=5 reports before any success rate is shown.
- Owned positioning and messaging end to end — repositioned from AI tool directory to AI workflow platform and rewrote the full site around an outcome-first thesis.
- Built the growth engine solo — programmatic SEO and AEO (84 ISR use-case pages, HowTo/FAQ JSON-LD, AI-crawler rules) and a 450+ builder community feeding content and signal back into the product.
